Odoo 13	Odoo Community	Odoo Enterprise
Windows	Download	Download
Ubuntu • Debian	Download	Download
RPM	Download	Download
Sources	Download	Download

Nombre	Fecha de modifica...	Tipo	Tamaño
odoo_13.0.latest.exe	13/06/2020 21:01	Aplicación	277.588 KB

2) Si Windows Bloquea la instalación le damos a ejecutar de todas formas

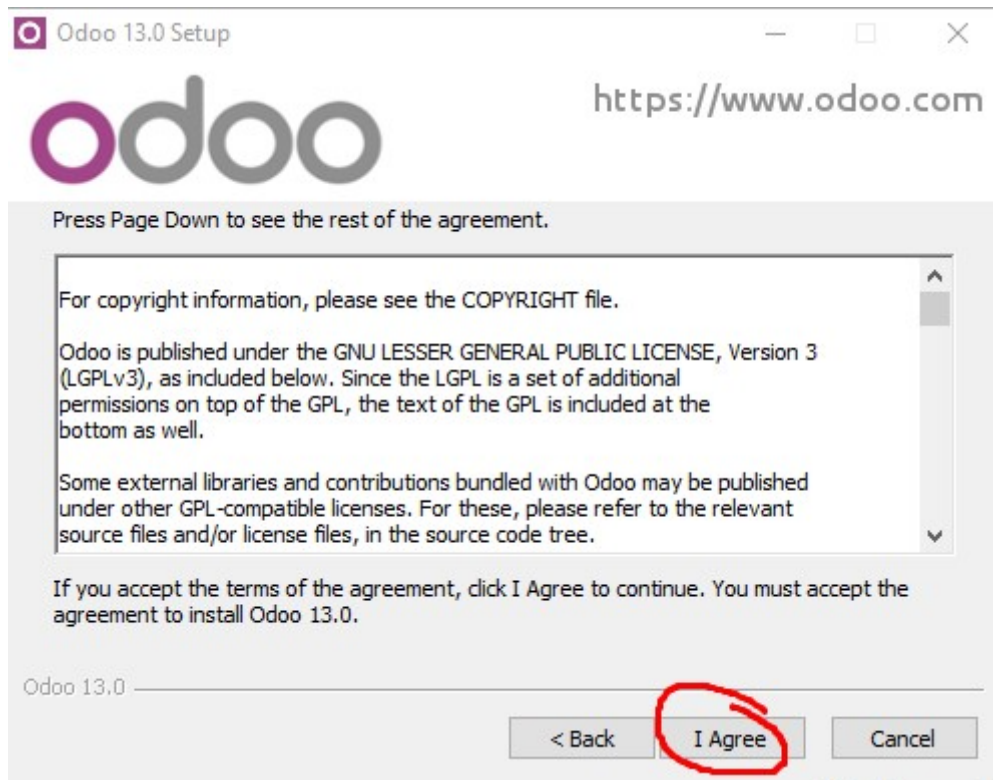

3) Seleccionamos el idioma

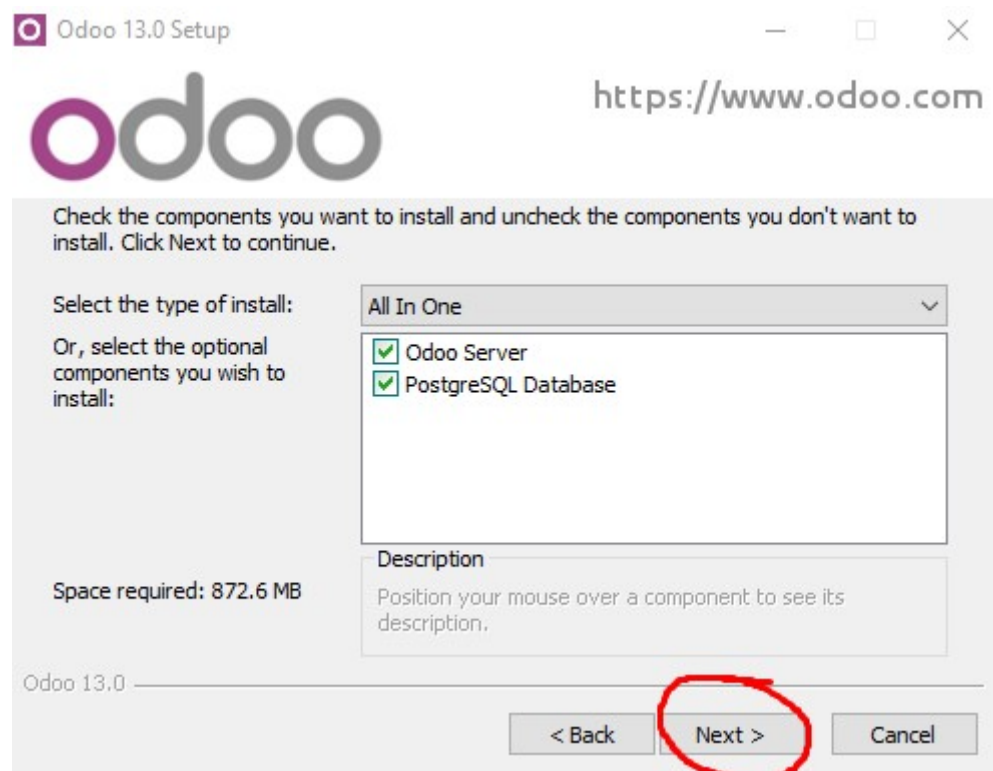

4) Seguimos las instrucciones de la instalación

5) Seleccionamos ambas opciones para que instale la base de datos de PostgreSQL y odoo

6) Podemos configurar los puertos de la base de datos y la ip del servidor de odoo

The screenshot shows the 'Odoo 13.0 Setup' window. At the top, there is the Odoo logo and the URL 'https://www.odoo.com'. Below this, the text 'Configure the information for the PostgreSQL connection' is displayed. There are four input fields: 'Hostname' with 'localhost', 'Port' with '5432', 'Username' with 'openpg', and 'Password' with 'openpgpwd'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. The 'Next >' button is circled in red.

7) Seleccionamos donde deseamos instalar odoo

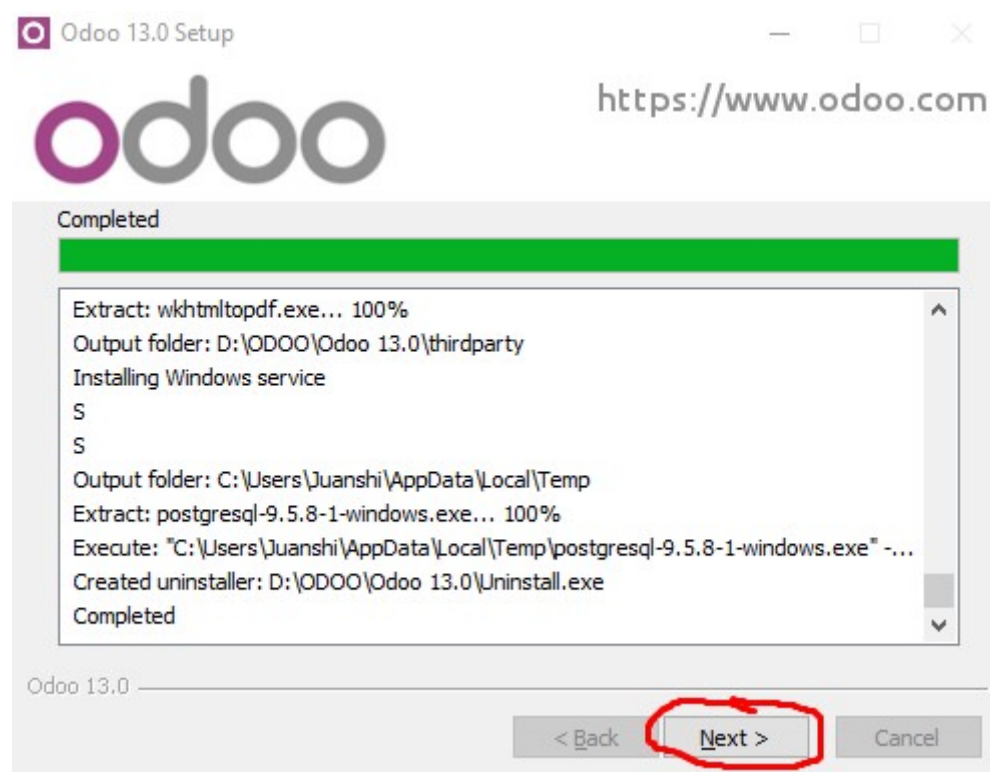

The screenshot shows the 'Odoo 13.0 Setup' window. At the top, there is the Odoo logo and the URL 'https://www.odoo.com'. Below this, the text 'Setup will install Odoo 13.0 in the following folder. To install in a different folder, click Browse and select another folder. Click Install to start the installation.' is displayed. There is a 'Destination Folder' section with a text box containing 'D:\ODOO\Odoo 13.0' and a 'Browse...' button. Below this, the text 'Space required: 872.6 MB' and 'Space available: 936.6 GB' is shown. At the bottom, there are three buttons: '< Back', 'Install', and 'Cancel'. The 'Install' button is circled in red.

8) Comenzará la instalación

9) Una vez termine, le daremos a siguiente

10) Seleccionamos start odoo y le damos a finish

11) Se abrirá nuestro explorador web, y configuraremos nuestros datos, nombre de la base de datos y la contraseña.

Database Name:

Email:

Password:

Phone number:

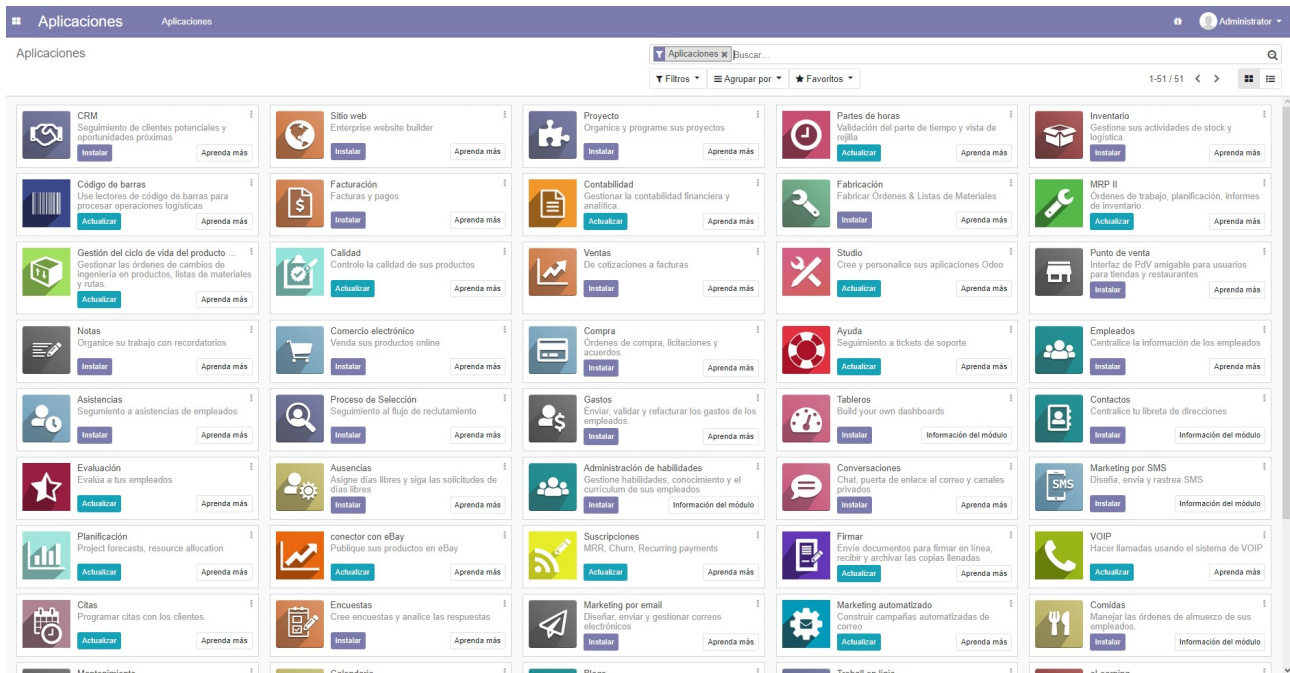

Language:

Country:

Demo data: ☐

or restore a database

12) ¡Ya tendríamos odoo instalado!

13) TIP: Podemos gestionar odoo desde services.msc (para parar o detener la base de datos y el servidor de odoo cuando queramos)
